EDUCATION

Engineering Student - Artificial Intelligence and Industrial Data Technologies **2024-2027**
National Graduate School of Arts and Crafts (ENSAM) *Meknes*

Integrated Preparatory Cycle for Engineering Schools (API Cycle) **2022-2024**
National Graduate School of Arts and Crafts (ENSAM) *Meknes*

Baccalaureate in Mathematical Sciences B **2021-2022**
Abdelkrim Raiss High School *Fez*

TECHNICAL SKILLS

- **Machine Learning / Deep Reinforcement Learning / NLP :** Scikit-learn, TensorFlow, Keras, PyTorch, NLTK, TextBlob, spaCy, XGBoost, Statsmodels, Prophet, tsfresh
- **Computer Vision / Image Processing :** OpenCV, MediaPipe, YOLO, Face-Recognation, Dlib, PIL, TesseractOCR
- **Data Analytics :** NumPy, Pandas, Matplotlib, Seaborn, SciPy, Excel, Plotly
- **Databases :** MySQL, MongoDB, Cassandra
- **Software Engineering :** Python, C/C++, R, Java, SQL, CSS, Julia, JavaScript, PHP, NodeJs, jQuery, Ajax, Angular, VueJs, Flask, Django, TailwindCSS, Bootstrap, Spring, Spring Boot, PyQt5, PyYAML
- **Development tools :** PyCharm, VS Code, Colab, Anaconda, Git/Github/GitLab, Docker, Eclipse, tqdm, MkDocs, Streamlit, Dash

ACADEMIC PROJECTS

Grounded Hybrid RAG Chatbot with Hierarchical Access *January-2026*
Tools : Next.js 15, FastAPI, Python, Supabase, TypeScript, Tailwind CSS, Ollama, SentenceTransformers, PaddleOCR, Faster-Whisper, PyMuPDF, MoviePy
Description : Developed a multimodal AI assistant for secure enterprise document retrieval. Engineered a grounded hybrid RAG architecture with strict hierarchical access control (ltree) to prevent hallucinations and restrict data exposure based on user roles. Supported text, PDF, audio, and video processing.

Electricity Demand Forecasting *May-2025*
Tools : Python, Scikit-learn, TensorFlow, REE API, Streamlit
Description : Built a time series model to forecast electricity demand in Spain using external data (weather, holidays). Combined classic ML and deep learning (LSTM, TCN). Delivered results through an interactive dashboard.

GestureMouseApp - Touchless Mouse Control *April-2025*
Tools : Python, OpenCV, MediaPipe, PyQt5, PyAutoGUI
Description : Developed a gesture-based desktop control app using a webcam. Enables cursor movement, clicks, volume/brightness control, and scrolling through hand gestures. Includes an FAQ chatbot and real-time hand landmark visualization.

SOFT SKILLS

- Curious and analytical thinker
- Methodical problem solver
- Focused and organized under deadlines
- Quick learner of new tools and concepts
- Clear and concise communicator
- Calm and resourceful in challenging situations.

LANGUAGES

Arabic : Native English : Professional French : Professional
